**ABC's Good Morning America  
147 Columbus Ave 10<sup>th</sup> Floor  
New York, NY 10023**

**Attention: Editor**

**This in my opinion is the "Story of the Century" my name is Lloyd D. Paine and I am the inventor and visionary that invented the smart phone. I have irrefutable evidence to prove my claim.**

**I have the copyrights for my first claim recorded in 1994 and a full Business Plan and Video that I produced to demonstrate my invention and claim, written and recorded Copyrights in 1997 and 1998.**

**I then formed my Company to bring my vision to life in 1997 under the banner of SatCom, Inc, after forming my company I then took my project to Stanford University in Palo Alto, California and contracted Stanford University under a "Sponsored Project Agreement" to assist me in designing and Patenting the hardware for what I called the "Librarian" an in-user interface the size and uses of present day tablets. ([www.spacesat.com](http://www.spacesat.com))**

**At Stanford University I was assigned Dr. Bruce Lusignan as my companies contact and Stanford's representative, he was at the time the head of Stanford's Satellite and Telecommunications Department. His dream was to find a way to deliver "A World Library of Books" to the world. When he seen the SatCom Business plan and Video he began his plans to steal the project from SatCom and he eventually succeeded with the help of Stanford University!**

**He took the project to Steve Jobs at Apple and Apple and Stanford developed the SatCom Librarian project as the I-Phone and I-Pad and they are now the riches company in the world!**

**The evidence I have is irrefutable, I have the copyrighted SatCom Business Plan and video, the SatCom-Stanford sponsored project agreement and proof of payments on the contract. I have a hand written letter by Dr. Lusignan to Stanford University outlining his plan to steal the project and a number of correspondences from Dr. Lusignan to Apple showing he took the project to**

**them. When you read the SatCom Business Plan and view the video it will become crystal clear who invented the Smart Phone and Smart Pad.**

**Lloyd D. Paine  
President/CEO  
SatCom, Inc.**
